Operational environment for these bearings is unique to steelmaking, comprising steel dust, water and heat.

In the steel industry, bearings can be found in a vast range of plant and equipment that is used in both upstream and downstream processes: from the storage yard for raw materials to the steelmaking, rolling and refining processes. All kinds of bearings are used in this plant and equipment.

New products and technologie

- NSK Develops a Long-Lasting, Sealed, Four-Row Tapered Roller Bearing for High-Speed Rolling Machines
- NSK Develops a Long-Life Sealed Spherical Roller Bearing with Improved Abrasion Toughness for Heavy Industry Applications
